Compliance settings 3

Compliance settings

The Compliance settings page behaves just as the General settings page, but it's restricted to the Backups and Compliance processes. Because the nccm uses its own database, it also has its own setup table. When restoring a Backups/Compliance (NCCM) database, the relevant settings are restored along with the data.

Class:

Variable	Str value	Num value	Class	Description
Cmpl_max_children	*	3	Constants	Compliance max children
Default_cmpl_rule_se...		1	Constants	Default severity for compliance rules (Medium)
Nccm_max_children	*	3	Constants	Nccm deamon max children alive at the same time
Nccm_poll_interval	*	300	Constants	Nccm deamon poll cycle length
Cmpl_condition_include	Must contain	0	Translation	Compliance condition include type
Cmpl_condition_include	Must not cont...	1	Translation	Compliance condition include type
Cmpl_condition_include	Must contain ...	2	Translation	Compliance condition include type
Cmpl_condition_include	Must contain ...	3	Translation	Compliance condition include type
Cmpl_node_scope	yce	0	Translation	Compliance node scope
Cmpl_node_scope	cmdb	1	Translation	Compliance node scope
Cmpl_policy_schedule...	disabled	0	Translation	Compliance policy schedule status

Variable:

Cmpl_condition_include

Class:

Translation

Str value:

Must contain lines

Num value:

2

Str value b:

Description:

Compliance condition include type

There are translations, which translate the labels on some of the dropdowns and numerical values for the different options in the compliance and nccm. Tweaks and constants contain a number of user-modifiable constants. For more information, refer to the [NCCM Tweaks](#) and [CMPL Tweaks](#).

The new button shows a form with which you can create a new lookup entry, and the delete button allows you to delete lookup entries. Note that unless you know what you're doing, this is not recommended.
